Study on Planning Method of Housing  
Considering Safety, Relief and Ease of Child-care

Hiroshi HASEGAWA

概要

少子化が進行する中で、子どもを産み・育てやすい住環境の実現が求められている。このため、地方公共団体の子育て住宅認定制度の認定基準に係る調査、事業者等の子育て世帯向け住宅の取組み事例に係る調査、子育て世帯の住宅及び住環境のニーズに係る調査を実施し、これらの調査結果を踏まえて、子育ての安全・安心やしやすさに配慮した住宅の計画手法について検討し、住宅の性能・仕様や住環境等に係る配慮事項や技術情報について取りまとめた。

キーワード : 子育て配慮住宅、計画手法、住宅性能・仕様、住環境、子育て・子育て支援サービス

Synopsis

In this Research Report, I developed planning method and made a draft guideline of housing considering safety, relief and ease of child-care from the viewpoints of planning of housing performance/specifications and dwelling environment such as location of the housing which is safe and convenient for child-care. In preparing the draft guideline, the following researches were carried out; 1) Research on housing standards related to child-care housing certification system in local governments. 2) Research on advanced cases of child-care housing efforts of business operators. 3) Research on needs of housing and dwelling environments of child-care households.

Key Words : Housing Considering Safety, Relief and Ease of Child-care, Planning Method, Housing performance and specification, Dwelling Environment, Child-care Support Service
